DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 12-14, 23-25, and 34-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Palmer et al ("Palmer", USP 6577324).

Regarding claims 1, 12, 23, and 34, Palmer teaches a user interface for providing instructional information (col 1, lines 62-64), comprising instructional text describing a plurality of steps to perform a task (col 22, lines 49-56 and Fig. 23); and a plurality of alternative media indicators (textual documentation or audio presentation or video presentation), each of the plurality of alternative media indicators (reference characters 788 and 784) associated with one or more of the plurality of steps and selectable to cause presentation of an alternative media presentation instructing performance of the associated one or more of the plurality of steps (col 23, lines 1-10).

Regarding claims 2, 13, 24, and 35, Palmer teaches that a first of the alternative media indicators (talking keys, audio presentation) is associated with a first one or more of the plurality of steps (col 23, lines 16-18), wherein a second of the alternative media indicators (video presentation) is associated with a second one or

Art Unit: 2173

more of the plurality of steps (col 23, lines 20-23), and wherein a third of the plurality of alternative media indicators (textual presentation) is associated with the first one or more of the plurality of steps and with the second one or more of the plurality of steps (col 23, lines 18-23).

Regarding claims 3, 14, 25, and 36, Parmer teaches that each of the plurality of steps is associated with one of the alternative media indicators (col 23, lines 14-20).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-11, 15-22, 26-33, and 37-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Palmer and Brewer et al ("Brewer", USP 5550967).

Regarding claims 4-5, 15-16, 26-27, and 37-38, Palmer teaches a user interface for providing instructional information (col 1, lines 62-64), comprising instructional text describing a plurality of steps to perform a task (col 22, lines 49-56 and Fig. 23); and a plurality of alternative media indicators (textual documentation or audio presentation or video presentation), each of the plurality of alternative media indicators (reference characters 788 and 784) associated with one or more of the plurality of steps and selectable to cause presentation of an alternative media presentation instructing performance of the associated one or more of the plurality of steps (col 23, lines 1-10). Palmer differs from the claim in that Palmer does not teach a search interface to allow

the user to search for desired instructional text. However, such feature is known in the art as taught by Brewer. Brewer teaches a help interface which comprises the searching for instructional information (line 66 of col 9 to line 6 of col 10). It would have been obvious to one of ordinary skill in the art, having the teaching of Palmer and Brewer before him at the time the invention was made, to modify the help system taught by Palmer to include the search function taught by Brewer with the motivation being to enable the user to quickly access to the desired help function.

Regarding claims 6, 17, 28, and 39, Palmer teaches that the instructional text comprises a plurality of steps to perform a task (col 22, lines 49-56 and Fig. 23).

Regarding claims 7, 18, 29, and 40, Palmer teaches that the instructional interface presents a plurality of alternative media indicators (textual documentation or audio presentation or video presentation).

Regarding claims 8, 19, 30, and 41, Palmer teaches that each of the plurality of alternative media indicators associated with one or more of the plurality of steps (reference characters 788 and 784).

Regarding claims 9, 20, 31, and 42, Palmer teaches that selection of one of the alternative media indicators causes presentation of an alternative media presentation, the alternative media presentation instructing performance of the associated one or more of the plurality of steps (Fig. 24).

Regarding claims 10, 21, 32, and 43, Palmer teaches that a first of the alternative media indicators (talking keys, audio presentation) is associated with a first one or more of the plurality of steps (col 23, lines 16-18), wherein a second of the

Art Unit: 2173

alternative media indicators (video presentation) is associated with a second one or more of the plurality of steps (col 23, lines 20-23), and wherein a third of the plurality of alternative media indicators (textual presentation) is associated with the first one or more of the plurality of steps and with the second one or more of the plurality of steps (col 23, lines 18-23).

Regarding claims 11, 22, 33, and 44, Parmer teaches that each of the plurality of steps is associated with one of the alternative media indicators (col 23, lines 14-20).
